PROJECT DOCUMENTATION

Digital Watch

Author: Shawn F
Date: October 20, 2026
Project Duration: 1 day

---

1. Project Summary

Purpose

Assemble a functional digital wrist watch. (Pretty simple)

---

2. Project Requirements

Requirements

- Must work
- Must fit well
- Must not take too much power

---

3. Materials and Equipment

Materials

Material	Count
1K resistor	1
104 ceramic capacitor	1
22 ceramic capacitor	1
32768Hz crystal oscillator	1
Momentary Switch	2
1.4*8mm self tapping screw	4
CR2032 battery holder	1
Micro Controller	1
PCB Board	1
Solder	-

Hardware

- Soldering Iron
- Handy Helpers
- Solder Extractor

---

6. Testing and Evaluation

Testing Criteria

Test	Result
Solder Joint Tests	Pass
Function test	Pass
Button Tests	Pass
Power test	Pass

Observations

Everything is working as intended.

---

7. Challenges and Solutions

Challenge 1

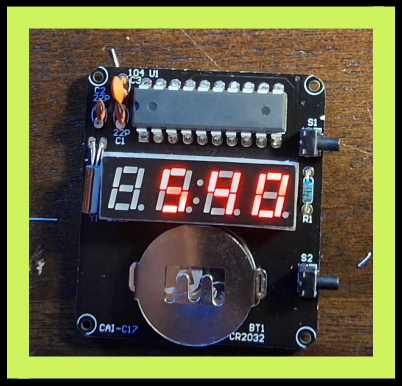

Solder iron spire not receiving enough heat

Solution

Use base of solder iron tip instead of the peak

---

8. Final Product
